

29 July 2019

To Whom It May Concern:

As Chairperson of the IHR's Institutional Review Board (IRB) I have engaged in a preliminary review of the draft Clinical Trial Protocol for the AMARANTH LIFE SCIENCES autism spectrum disorder clinical trial.

The draft Protocol appears to meet the ethical and scientific standards for a human clinical trial of dietary ingredients. I expect to recommend to the appropriate Subcommittee of the IRB that the final version of the Protocol be accepted and receive the approval of the Board.

The Report setting forth the results of the clinical trial, in conformity with the approved Protocol, will be eligible for publication in the Journal of the Institute.

Robert Goodman, PhD
Chairperson, IRB
